The Brain and The 5 Senses

A central illustration of a human brain is surrounded by five sense organs: an eye, an ear, a hand, a tongue, and a nose. A complex network of black lines connects each sense organ to a specific star-shaped marker on the brain. Five rectangular boxes are connected to these markers by thin lines. Each box contains a letter on a set of three horizontal lines (top, middle-dashed, bottom). The letters are: 'taste' (top-left), 't' (top-right), 's' (middle-left), 'h' (middle-right), and 's' (bottom-right).
